# From Innovation to Application

Andy Walker - Commercial Director, McLaren Applied Technologies

---

## INTRODUCTION:

What is innovation?

Needs to be end to end – about creation AND adoption

What's relevant in  
Healthcare?

We face weekly pressure not just to innovate, but to execute on that innovation

As we take innovations to markets – it's as much about people as technology

Healthcare is a prime example

No end of promising initiatives and new technologies

But Healthcare as a whole needs to change

It's a people challenge and hence a design challenge...

We see huge potential and we're investing in this area

# F1?

## WHY F1 IS RELEVANT? OUR DATA REVOLUTION

---

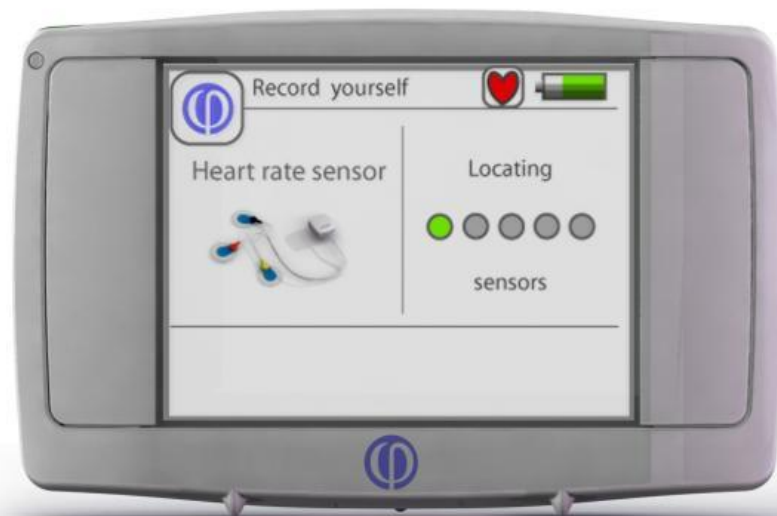

WHY F1 IS RELEVANT  
CARS LIKE HUMANS?

MONITORING  
HUMANS  
**MUCH LIKE F1  
IN 1960s?**

## WHY IS F1 RELEVANT: THE FIRST STEPS

# EARLY PLAYERS IN TELEHEALTH IN 2007

DATA IS  
EVERYTHING  
**BUT NOTHING**  
**WITHOUT**  
**INSIGHT &**  
**ADOPTION**

---

## **BIG DATA & BIG INSIGHT:** SOME CONSIDERATIONS

Data in healthcare is massively diverse

- Medicine Development

- Medical supply chain

- EHR

- Social networking

- Biotelemetry etc.

Need trust and confidence in data and to balance value with burden to collect it

A plume of data is coming

- in sports, consumer devices, clinical studies, smart manufacturing etc.

A pervasive intelligence is needed

- insight NOT data - across the industry

- opportunities for the healthcare system as a whole – and players within it

A close-up, low-angle shot of a cyclist's legs and torso, wearing a red and white Sky cycling jersey. The cyclist is in a dynamic, forward-leaning position, suggesting motion. The background is blurred, showing other cyclists and spectators.

LEADING EDGE  
WORK IN DERIVING  
INSIGHT FROM  
ATHLETE DATA IN  
ELITE &  
PROFESSIONAL  
SPORT

# USE OF BIOTELEMETRY TO DELIVER NEW INSIGHTS IN CLINICAL STUDIES

# AIDING BETTER UNDERSTANDING OF NEURO- DEGENERATIVE DISEASES

# INTERACTING WITH MEDICINE DEVELOPMENT DATA

A close-up photograph of a person's hand holding a small, black, rectangular device. The person is wearing a dark blue suit jacket. The background is blurred, showing what appears to be a modern building with glass windows.

# USE OF BIOTELEMETRY TO AID PATIENT ADHERENCE IN DRUG DELIVERY DEVICES...

...AND IN  
TACKLING  
**BIG SOCIAL  
ISSUES**

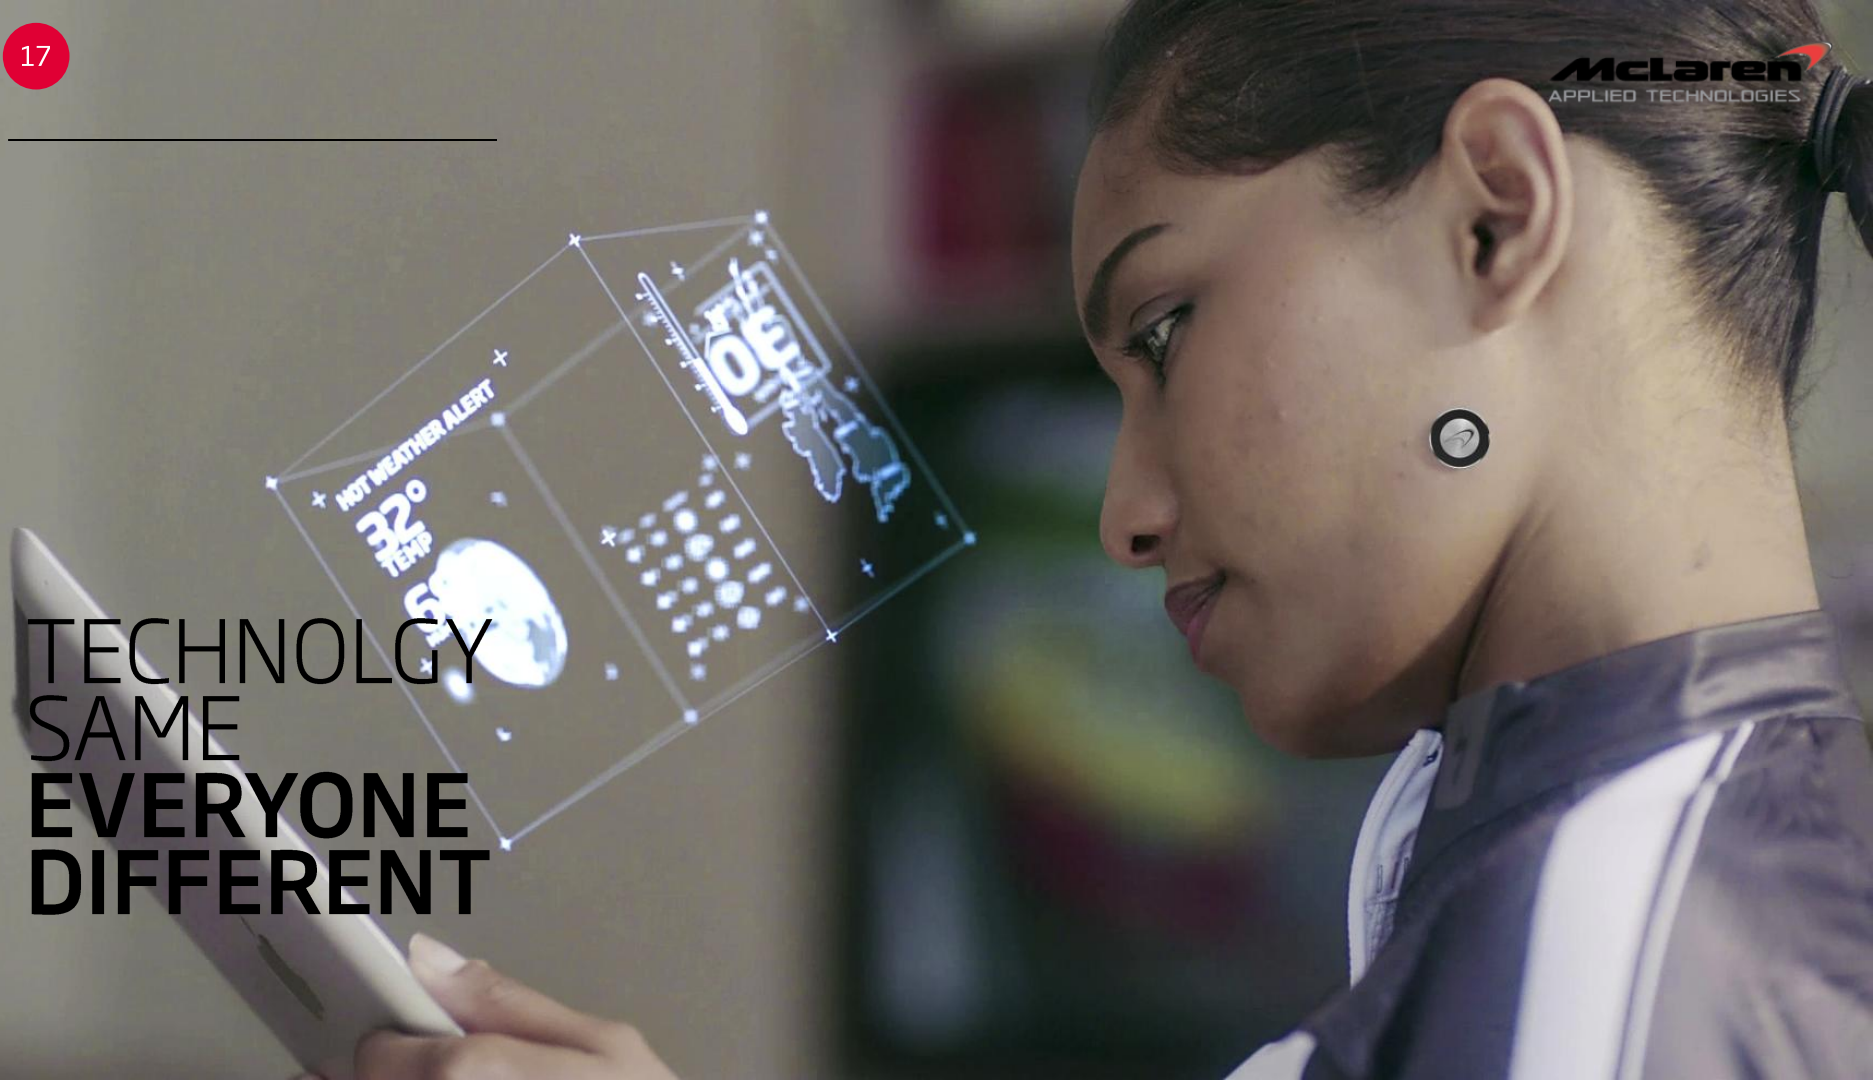

MAKING IT  
POSSIBLE TO  
DERIVE INSIGHT  
FROM DATA TO  
SPOT  
POTENTIAL  
ISSUES  
EARLIER

BEING  
YOUR  
BEST  
SELF

TECHNOLOGY  
SAME  
**EVERYONE  
DIFFERENT**

LETTING THE  
PARTICIPANTS  
DESIGN THEIR OWN  
CHANGE  
PROGRAMME TO  
OPTIMISE  
PERFORMANCE

---

## CONCLUSIONS:

Technology is changing the world – health is no exception

Experience tells us this will be a journey – to successfully adopt the breakthroughs

A challenge not to be underestimated even for making sense of data alone

BUT there are many examples in other industries where this has happened

Healthcare is facing a crossroads

The big step is to map out the bigger picture, to mobilise the right parties to make it happen and to ensure the people are brought along with it

Will the healthcare industry do this to itself from within – or is outside help required?

CAN IT BE  
DONE?  
**DEFINITELY**
